

PIP4004 - INTERNSHIP

Review-0 Presentation

Networking and Desktop end user

Student Details	
Name	Siri S
Roll No	20211CSE0768
Section	8 CSE-05
Batch No.	

Under the Supervision of,

Dr. Riyazulla Rahman J

Professor / Associate Professor / Assistant Professor
School of Computer Science and Engineering
Presidency University

Name of the Program: CSE

Name of the HoD: Dr. Asif Mohammed H.B

Name of the Program Project Coordinator: Mr. Amarnath J.L & Dr. Jayanthi. K

Name of the School Internship/Project Coordinators: Mr. Md Ziaur Rahman /
Dr. Sampath A K / Dr. Abdul Khadar A

About Company or Organization

- Tata Power Renewable Energy Limited, formerly Tata BP Solar, is an Indian company that specialises in solar energy services. The company manufactures solar modules, solar cells, and other solar products, and provides EPC services for solar power projects. In February 2017, Tata Power Solar became the first Indian company to ship over 1 GW solar modules worldwide. The company's manufacturing unit in Bangalore has a production capacity of 400 MW of modules and 300 MW of cells.
- Tata Power and BP Solar established Tata BP Solar, a joint venture company, in 1989. The company began commercial operations in 1991 by establishing its first manufacturing unit with a production capacity of 3 MW. BP Solar was closed on 21 December 2011, when BP announced its departure from the solar energy business. On 30 August 2012, Tata BP Solar India Limited was renamed as Tata Power Solar Systems Limited and became a wholly owned subsidiary of the Tata Group.

About Company or Organization

- In August 2016, Tata Power Solar commissioned a 100 MW solar project at the NP Kunta Ultra Mega Solar Power Project in Anantapur, Andhra Pradesh. This was the largest solar project commissioned using domestically manufactured solar cells and modules at the time.
- In 2022, Tata Power Solar raised 4,000 crore from Tata Power and a consortium of investors led by BlackRock, which also includes the Mubadala Investment Company.

Working domain or the technology

Working Domain

Networking and Desktop end user

- **Networking** is used to describe the range or area where certain networking rules or services apply, ensuring effective communication or management of resources.
- **Desktop end user** controls environment where their device, identity, and access permissions are managed within a larger network infrastructure, usually to provide both security and ease of management.

About your team and reporting Manager

- During my internship at Tata Power Renewable Energy Limited, I had the opportunity to work as part of a Networking and Desktop end user team responsible for improving to interact and manage desktop computers, ensuring efficient use of software, hardware, and network resources to complete tasks and support productivity.
- The team consisted of ten members, including a project manager, team leader, desktop end users, and myself as an intern.

Reporting Manager

Mr. Paresh Onsker, Group Head — Infra and Infosec (Renewables)

Challenges Faced in Internship

- **Challenge in identifying the right opportunities**

Struggled to find internship opportunities that matched my skills and interests.

- **Difficulty in articulating knowledge during interviews**

Found it stressful to clearly communicate my knowledge and expertise.

- **Adjusting to team's working style and fast-paced environment**

Initially overwhelmed by the team's dynamics and the fast pace of work.

- **Learning new software and tools**

Faced challenges in adapting to the software and tools commonly used by the team.

- **Overcoming challenges with support and effort**

With guidance from the team and consistent effort, I became more comfortable and started contributing effectively.

Objectives of the work

- **Technical Support & Troubleshooting:** Assist desktop end users with troubleshooting hardware and software issues, ensuring systems run smoothly.
- **Network Configuration & Maintenance:** Support the configuration and maintenance of network systems, including troubleshooting connectivity issues and ensuring network security.
- **System Optimization:** Improve the performance and functionality of desktop systems by conducting routine updates, monitoring network performance, and managing resources effectively.
- **User Assistance & Training:** Provide guidance to end users on best practices for using networked systems and software, ensuring efficient workflows.

Objectives of the work

- Purpose: The goal was to ensure the proper functioning of desktop systems and networks, minimizing disruptions, and enabling end users to work efficiently.
- Usage: My work helped ensure that both desktop systems and network infrastructures were optimized, reducing downtime and ensuring seamless access to resources. By providing technical support, I played a role in maintaining high productivity levels and smooth day-to-day operations for users across the organization.
